DEKON VIRTUAL EVENT SOLUTIONS

Virtual event platforms incorporate a variety of tools to plan, promote, and execute online events. These products are designed to help businesses deliver the same feel and value of in-person events through digital experiences. As a result, virtual event platforms are flexible software solutions that can be used to manage and host different types of online events, such as association meetings, multi-session conferences, trade shows etc.

Virtual event platforms share many of the same features of event management platforms. While the latter focuses on managing in-person events, virtual event platforms facilitate digital experiences via built-in webcasting capabilities, integrations with webinar software, or both. Virtual event platforms also help recreate in-person event experiences by incorporating interactive content, such as Q&A, live polls, group chat, and 1:1 networking.

DEKON is happy to provide its clients with a platform featuring cutting edge design, community features, integrated webinars and live video to deliver the unique value of events in an online only event environment tailor-made to your needs.

IMMERSIVE CONTENT & LEARNING
